### Pre-Anesthesia Bloodwork--

Your pet is in for anesthesia/surgery and should do fine. We highly recommend a pre-op blood profile to be performed for the purpose of ensuring your pet to be in a low risk category during anesthesia. By performing this important pre-op blood profile, we will be able to rule out any preexisting internal problems that may not be evident physically, but could lead to serious complications. There is an additional fee of \$ 51.70 for these important procedures. Please indicate your choice by signing on the line below the appropriate response.

Please complete the blood work, recommend by doctor, prior to the surgery on my pet. If abnormalities are found, please call and inform me at the number given below.

### Laser Surgery--

Now your pet can benefit from the same properties of laser that human patients have experienced for many years; less pain, swelling, and discomfort after surgery, and the ability to resume normal activities sooner. There is an additional fee of \$ 44.50.

Please perform the surgery with laser,

I do not wish to have surgery with laser.
